

include/init_makeBloom.h

```
graph TD; A[include/init_makeBloom.h] --> B[stdint.h]; A --> C[defines.h];
```

The diagram illustrates a header file dependency. A top-level box labeled 'include/init_makeBloom.h' has two arrows pointing downwards to two separate boxes below it: 'stdint.h' on the left and 'defines.h' on the right. This indicates that the 'include/init_makeBloom.h' file includes both 'stdint.h' and 'defines.h'.

stdint.h

defines.h
